

Freemasons Charge List Software Programme

Keeping track of which brethren in the Lodge have undertaken the various 'charges' in our ceremonies is an essential activity to ensure our various ceremonies are competently delivered and all brethren who desire get a chance to regularly participate.

This task is one that the Director of Ceremonies would usually do. However whoever the brother is that does it, needs to ensure that the records are passed to his successor.

The **Freemasons Charge List** Software programme has been developed to enable the allocation of charges for the degree being worked and provide for the reporting of the allocated charge list for distribution. Importantly, it records the detail, enables look up on most things, and also reports on who has delivered which Charge to whom and when.

If you are interested in this software programme then email W Bro Richard Illingworth at the following email address [logtimer at yahoo.com](mailto:logtimer@yahoo.com) . He will forward you the programme + the Help Guide and volunteer his time to assist with the installation.
