## MANAGING THE FUTURE OF FREEMASONRY – A BOOK OF OPTIMISM by David West

The golden years of Freemasonry have passed with the departure of a world never likely to return. We cannot pretend that our membership problem will simply go away. If we are to rescue our order, we must take an objective look at ourselves and understand the society we now face. Our challenge will be to renew our ideals and bring them to the attention of a new audience, one that we as yet know little about. This will require hard work, open-mindedness, creativity and above all leadership. The optimism that runs through this book depends upon our ability to change, knowing that holding on to the past will be the last thing our order does.

## **LODGE TALKS by Mike Karn**

A collection of 15 ten-minute talks that can be read at a Craft meeting, perhaps when a lodge has little or no work. A valuable asset to any lodge, this book will help stop those meetings where only lodge business is dealt with. A good way to retain attendance since most brethren do not appreciate this - and who would invite a guest to such a meeting? It's also important to make sure that you have a set of educational and inspiring talks to perform, just in case your candidate does not make it to the meeting. This is why the talks have been written so they may be read without any rehearsal.

This book was written and designed to be the perfect set of easy to perform, straight forward and understandable talks. The subjects are all relevant to the Craft and not too heavy in content. Having tried and tested the talks on many occasions, the author has found they create interest and discussion, making for an engaging and often lively evening. Such talks can help to keep lodges active and to survive in somewhat difficult times. It seems that explaining more about the Craft can also assist in the retention of lodge members by keeping their interest.

A4 page format and - Large print for easy reading - Ring bound for public performance
